Introduction:

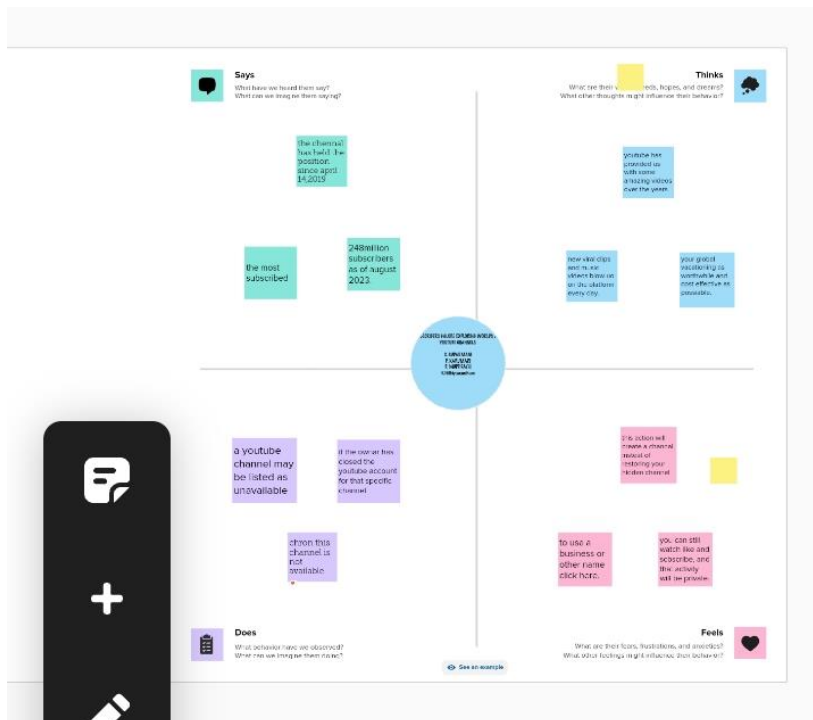

I am s.sudarmani, department of mathematics from government arts and science college kadayanallur, and I am team leader for the ~~NAAN MUDHALVAN~~ project, my team mates are,

- 1) P. Muppidathi
- 2) P. karumari
- 3) K. Nithiyanandham

Definition:

Empathy map:

Then next we make the empathy map in this map we collect the information, what we say, what we think and what we do these all information are given in this mural pages as given below.

Brainstome and idea prioritation:

Then we create and define the problem statement and any more details we give in the brainstome and idea prioritation mural pages

Data collection and extraction:

In this session we collect the dataset and do data preparation and connect data with tableau desktop.

Data visualization:

In this visualization is done in the tableau desktop sheet1 and called as Rank wise channel and soon.

- ❖ Rank wise channel
- ❖ Number of channel wise brand
- ❖ Channel brand
- ❖ Channel wise sub
- ❖ Number of channels of a language
- ❖ Category wise language
- ❖ Country and language
- ❖ Language wise sub
- ❖ Country wise sub

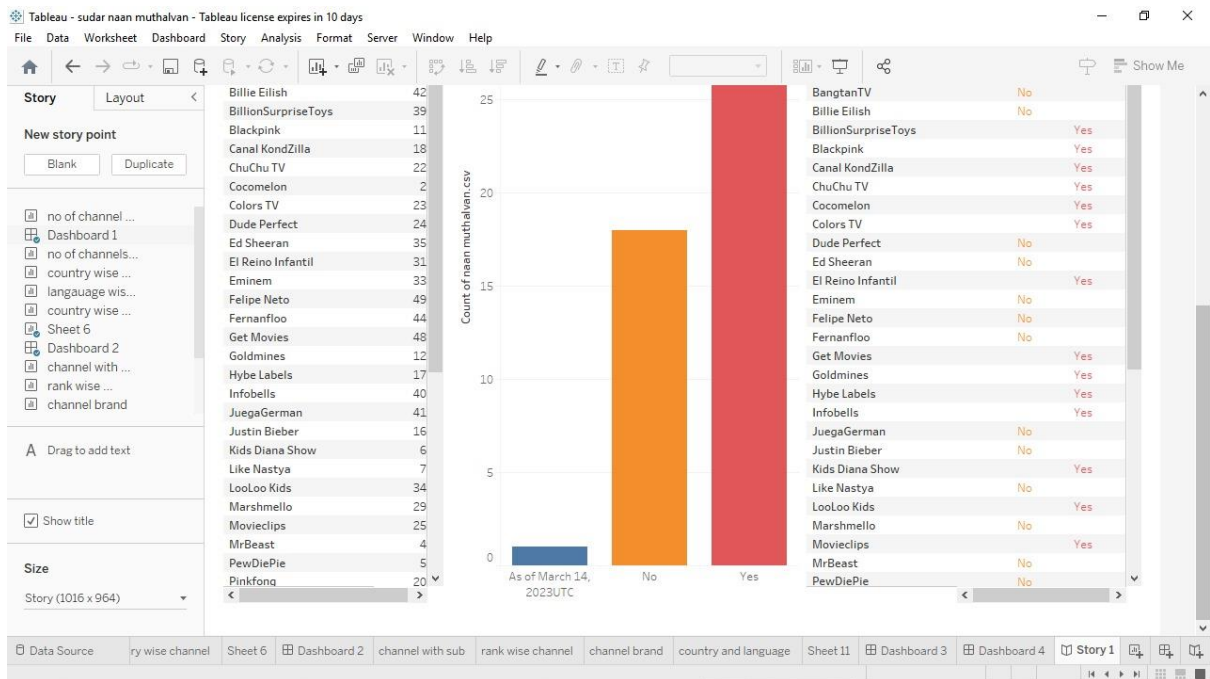

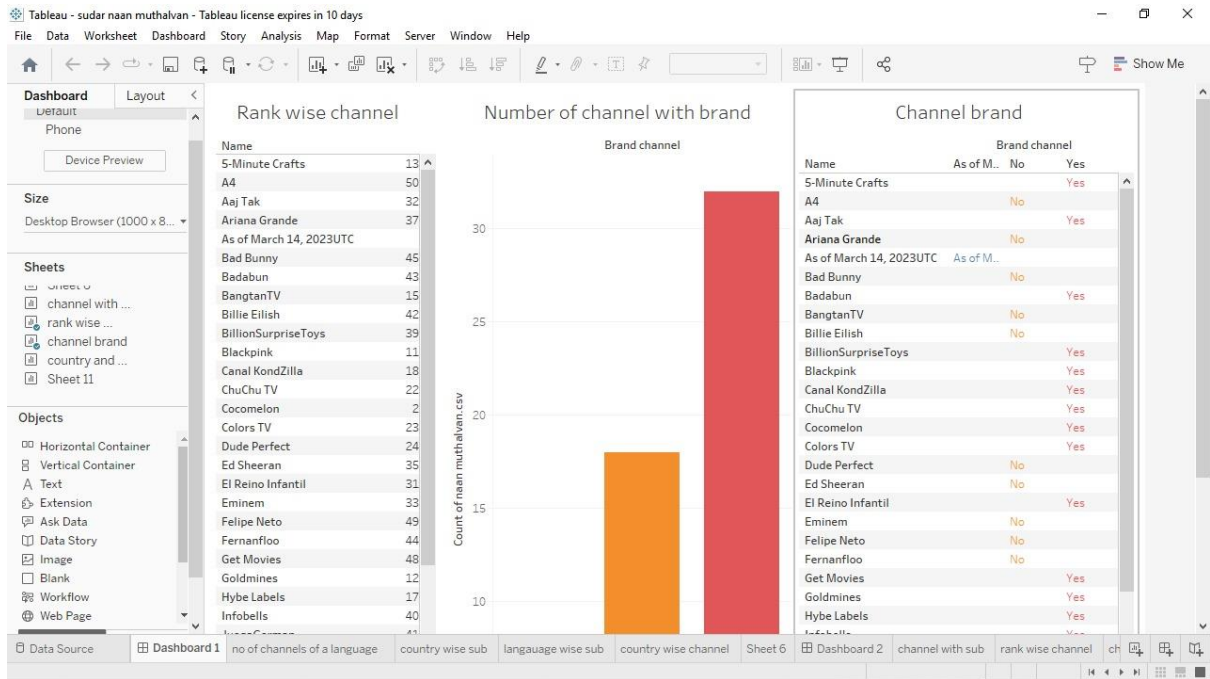

Result :

In this result we do the out puts for this project

Dash bord 1:

In dashboard 3 combine three visualization sheets.
There are

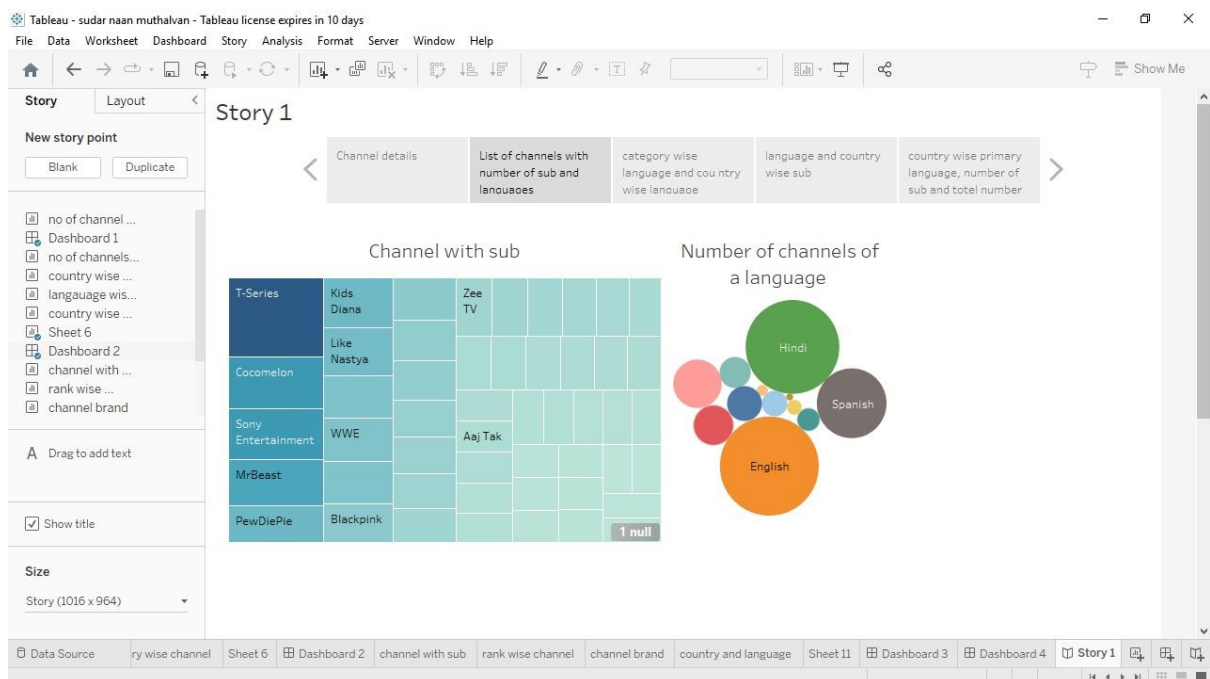

- ❖ Rank wise channel
- ❖ Number of channel wise brand
- ❖ Channel brand

Dash bord 2:

In dashboard 2 combaine two visualization sheets. There are

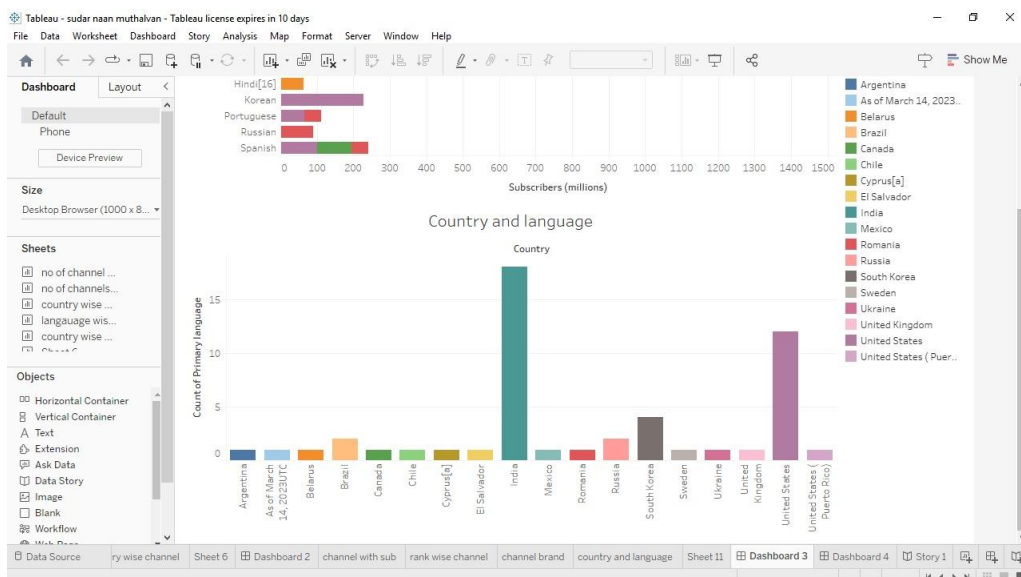

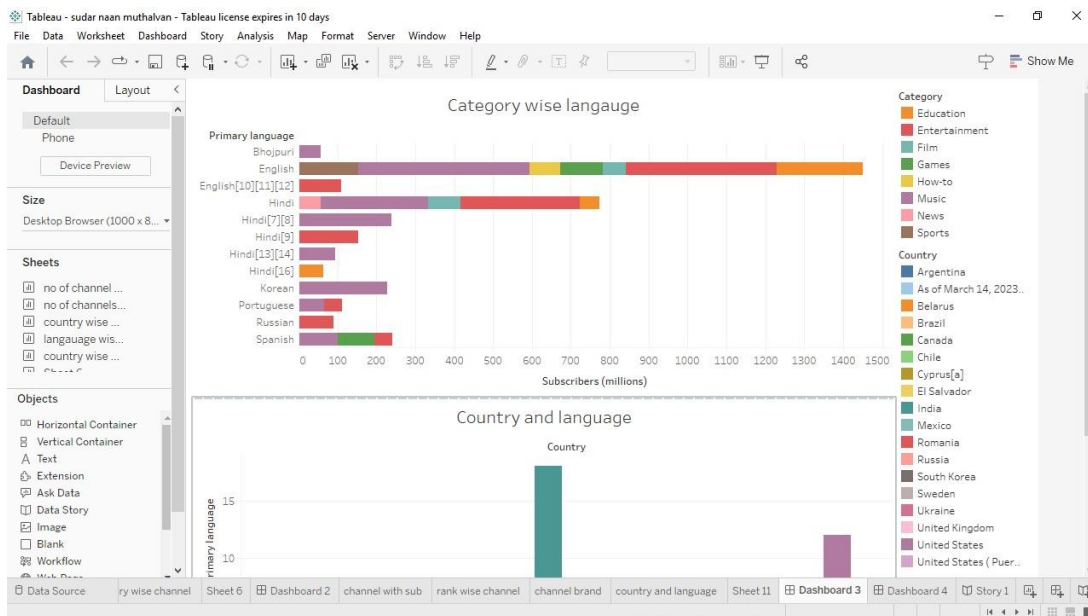

- ❖ Channel wise sub
- ❖ Number of channels of a language

Dash bord 3:

In dashboard 2 combine two visualization sheets. There are

- ❖ Category wise language
- ❖ Country and language

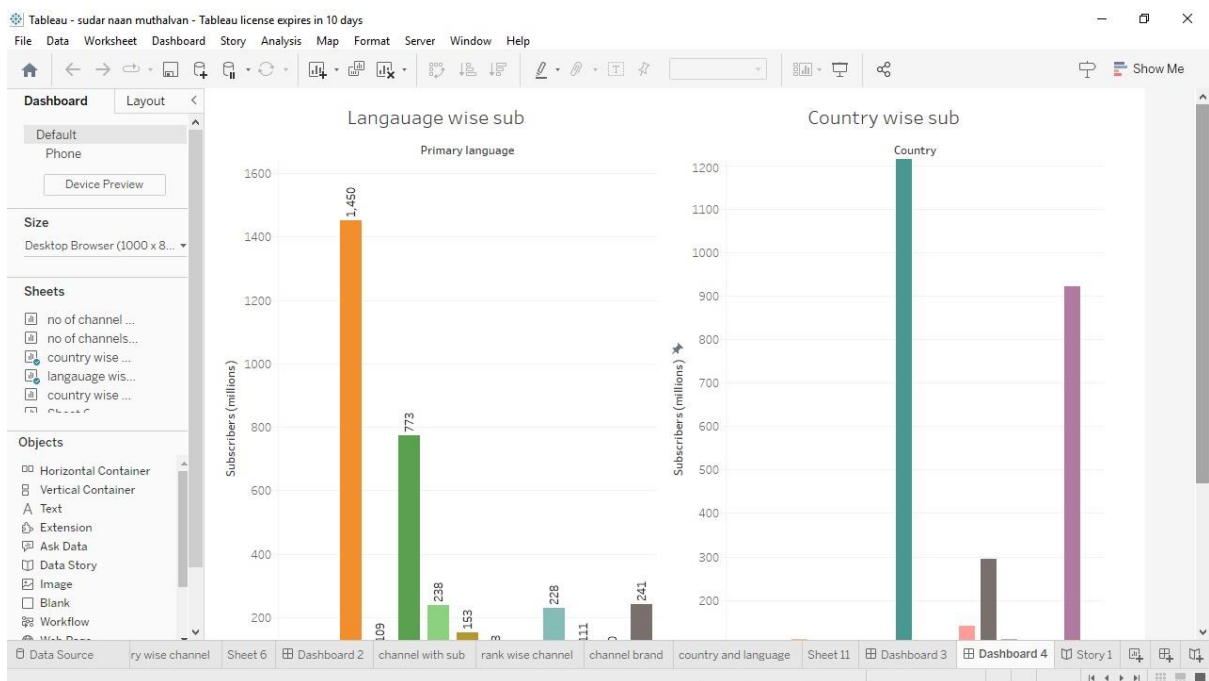

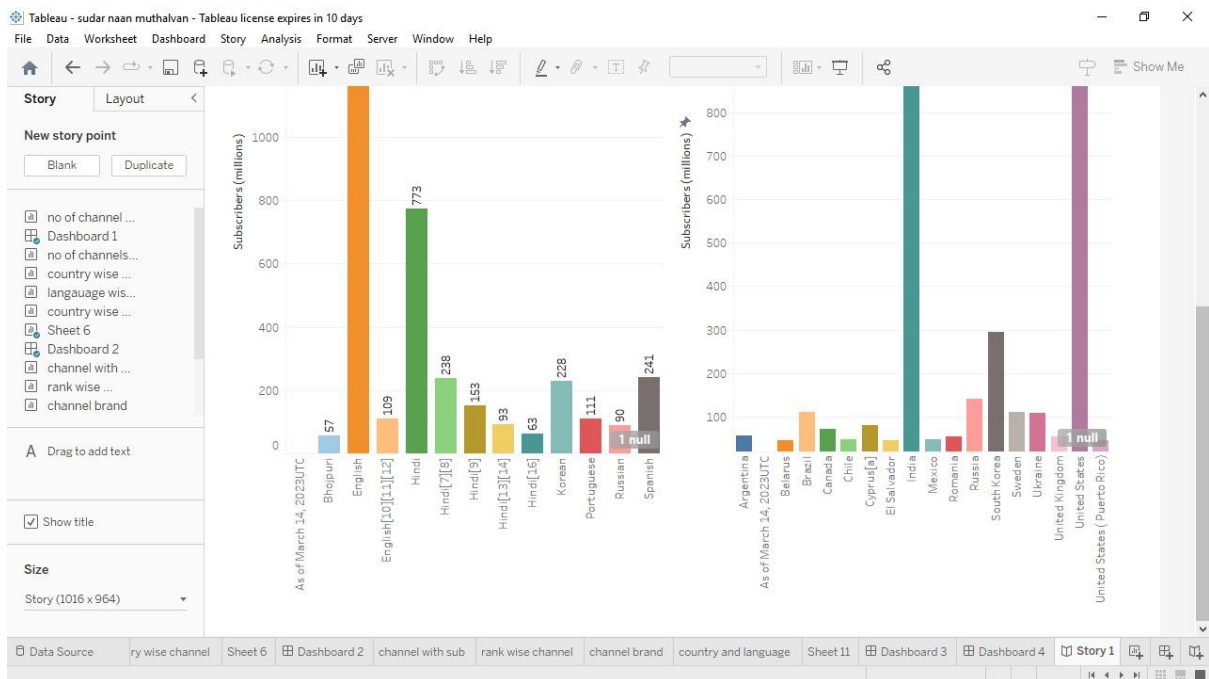

Dash bord 4:

In dashboard 2 combaine two visualization sheets. There are

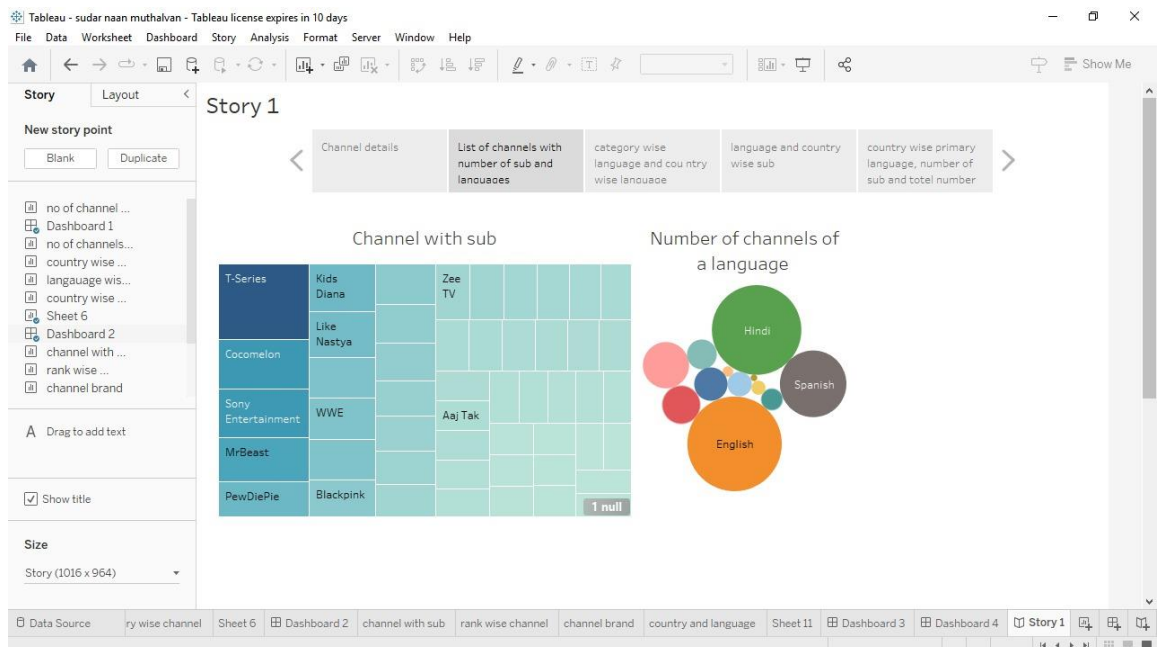

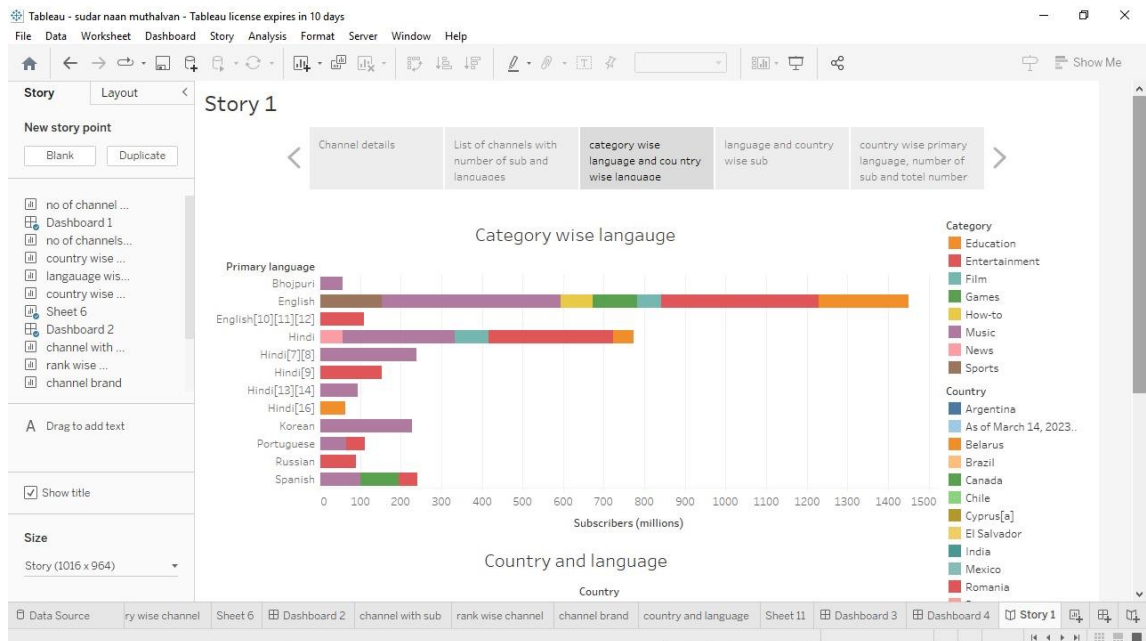

❖ Language wise sub

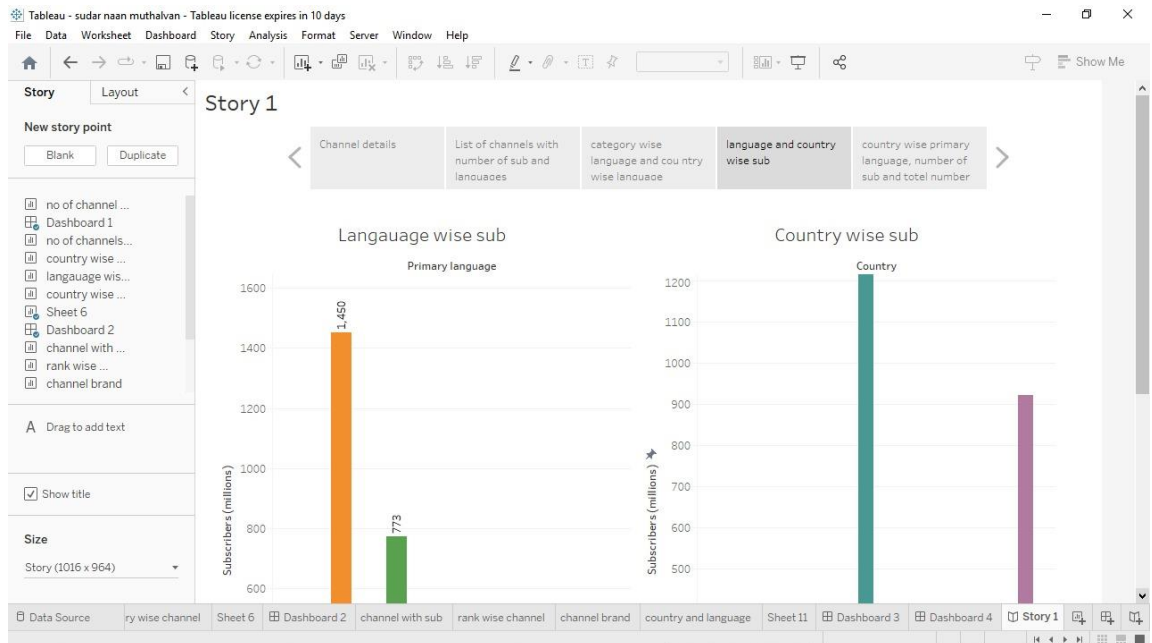

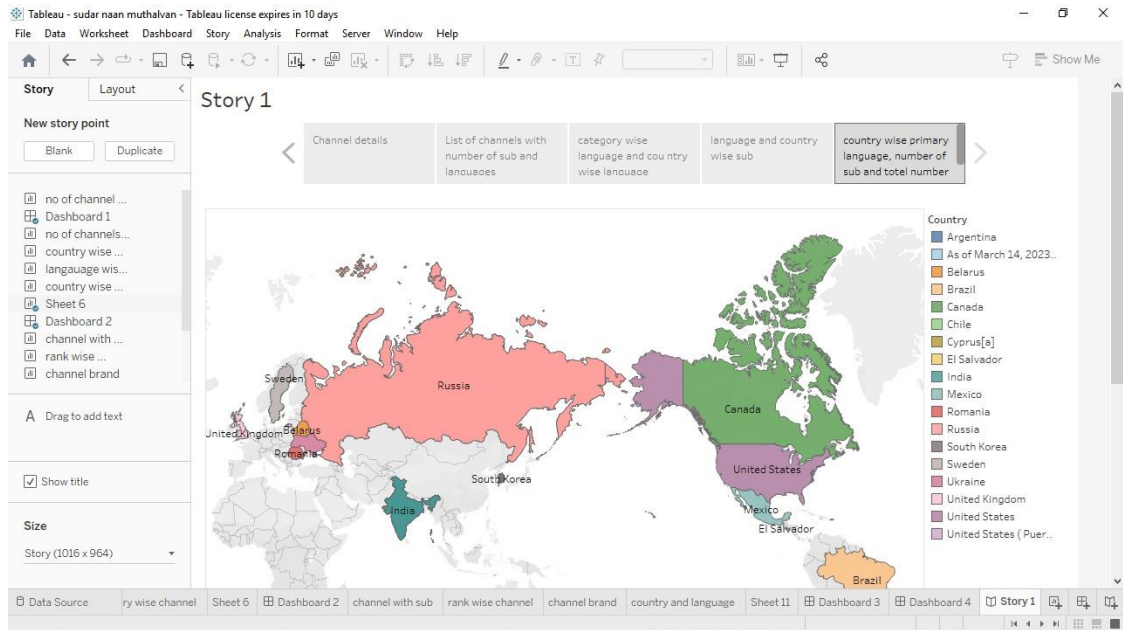

❖ Country wise sub

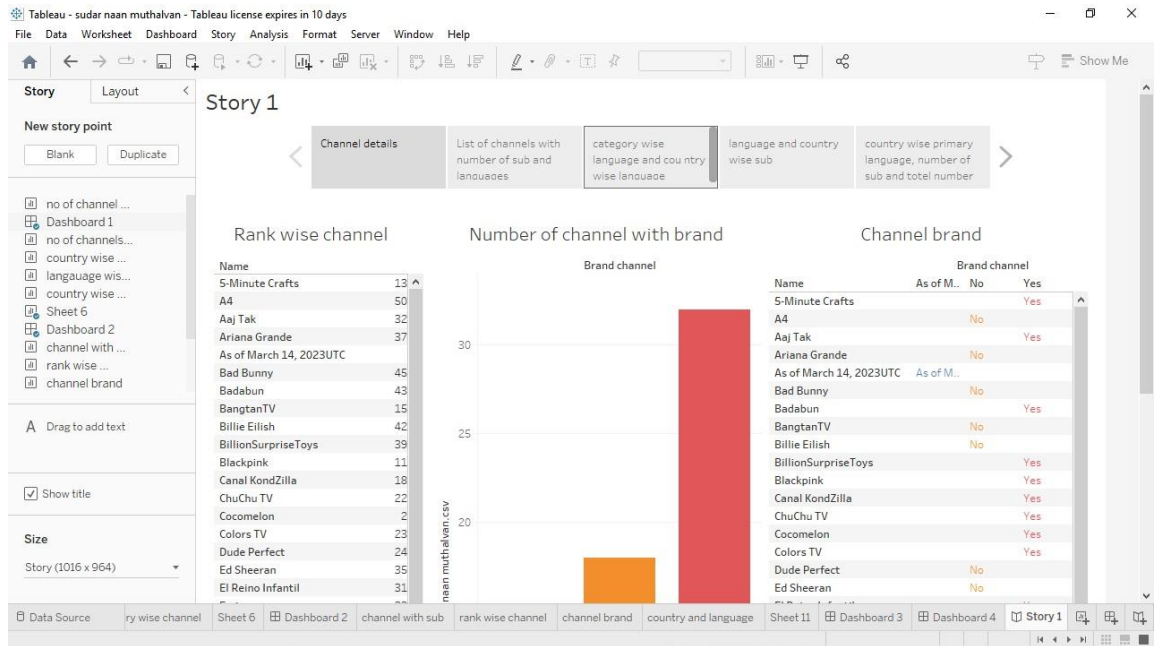

Story 1:

In this story 1 these 9 visualization sheets are compined

Conclusion:

In this conclusion, I explain my project solving problem explanation in this above dash bord and story.
